# EXPERIMENT-7

**ROLL NO:** 240701137 **NAME:** FEMINNA G

# USER INTERFACE AND DESIGN

Experiment on App Layout and Color Scheme Evaluation Using GIMP

## Objective:

To design and compare different app layouts and color schemes, collect user feedback, and improve the design based on usability and visual appeal.

## Description of Prototypes

**Prototype 1 – Photos App (Dark Theme)**

- **Theme:** Dark
- **Layout:** Grid-based
- **Features:** Categories like Favorites, Screenshots, Archive
- **Design Focus:** Clean, minimal, media-focused

**Pros:**

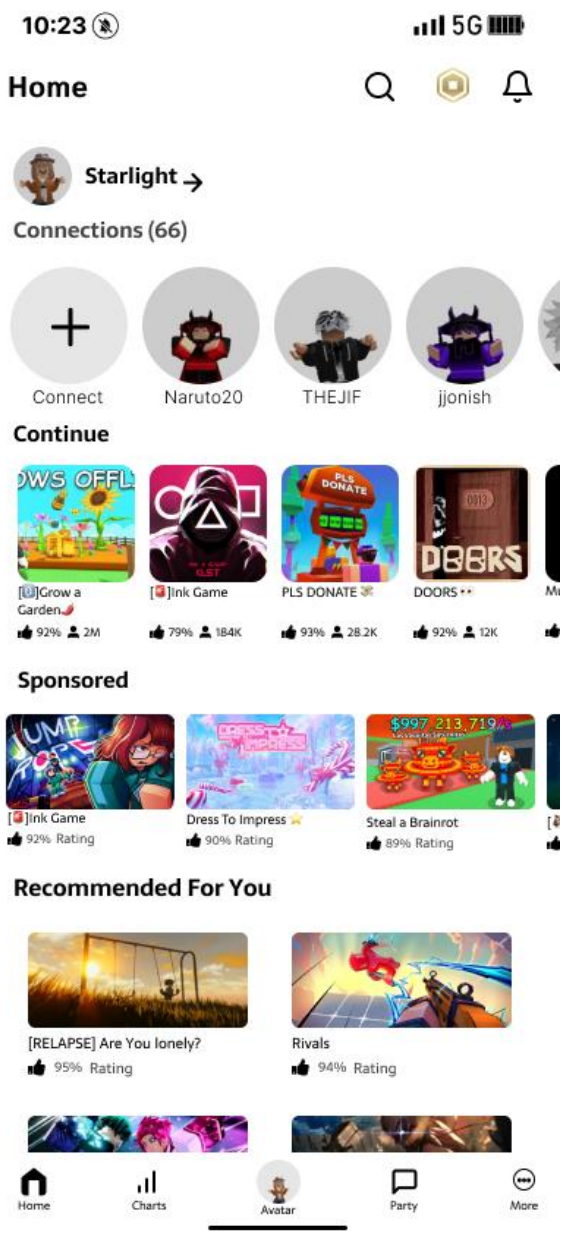
- Easy on eyes
- Good content visibility

- Clean layout

**Cons:**

- May feel slightly repetitive
- Less vibrant

## Prototype 2 – Gaming App (Light Theme)



- **Theme:** Light

- **Layout:** Scrollable feed
- **Features:** Recommendations, sponsored content
- **Design Focus:** Engagement and content discovery

**Pros:**

- Attractive and interactive
- Easy navigation
- Familiar layout

**Cons:**

- Can feel cluttered
- Too much content at once

## Prototype 3 – Maps App (Hybrid Theme)

- **Theme:** Mixed (light map + UI overlays)
- **Layout:** Map-centric
- **Features:** Search bar, directions, location details
- **Design Focus:** Functionality and clarity

**Pros:**

- Highly functional

- Clear navigation tools
- Real-world usability

**Cons:**

- Less focus on aesthetics
- Can look information-heavy

# Feedback Collection

Feedback was collected using Google Forms.

### Questions Asked:

- Which design do you prefer?
- Which is easiest to use?
- Which has the best color scheme?
- Any suggestions?

# Analysis of Feedback

Example (you can slightly adjust based on your class feedback):

- **Most Preferred:** Prototype 1 (Dark Theme)
- **Most Usable:** Prototype 3 (Maps UI)
- **Most Attractive:** Prototype 2 (Gaming UI)

### Common Observations:

- Users like **dark mode for comfort**
- Users prefer **simple layouts over cluttered ones**
- Too much content reduces usability

## Improvements Made

Based on feedback:

- Reduced clutter in Prototype 2
- Improved contrast in Prototype 1
- Simplified controls in Prototype 3

## Result

The final refined design achieved better usability, readability, and user satisfaction compared to the initial prototypes.

## Conclusion

Different layouts and color schemes significantly impact user experience. User feedback helps identify usability issues and improve design effectiveness.
